RECEIVED CHR
JUN 27 1977
RECORDS ROOM

Classification Cancelled

On changed to

By Authority Of Div. of Classification

By JKH/tuck/cb Date 5/16/74

The specimens from both the large and small bowel so
nearly filled the jars that there was an insufficient space for the alcohol
and hence a good deal of decomposition has occurred. This probably holds
true for the liver samples also. I have added a little formalin to each of
the intestinal samples to try to reduce formation of gas. Sincerely yours,

SHB:rmh
